Average size of zooplankton (all taxa combined) in Onondaga Lake from April until October in 1999 to 2011 compared to annual alewife catch rates from electrofishing from 2000-2011.

Note: error bars are standard error.

Average size of zooplankton (all taxa combined) in Onondaga Lake from April until October in 1999 to 2011 compared to annual alewife abundance estimates from hydroacoustic surveys conducted in June from 2005-2011.

Note: error bars are standard error. Hydroacoustics report indicates that 2008 and 2009 alewife abundance is likely overestimated due to interference from bubbles.
