

Library Reference 6.4

Nearshore water clarity conditions measured as Secchi disk transparency during 2010. The percent shown in figure indicates compliance with swimming safety guidance value (1.2 m), and the shaded area of pie charts indicates percent of samples where Secchi depth was below guidance value for the period June 1 through September 30.

Multiple readings in 2010 was reported as “greater than” the water depth at the monitoring station (e.g. “Secchi disk reading on the bottom.”). These values ranged from 1.2 m to 1.5 m. Values that were reported "on bottom" in less than 1.2 m of water were excluded from this compliance evaluation (1 sample result in 2010)
