

Library Reference 9.7

**Relative abundance of fish species caught in gill nets in 2010.**

*A single net was set in each of the lakes five strata, on bottom, in 4 to 5 m of water, within one week of electrofishing in spring and fall.*

**Graph Data**

Species	Mean CPUE	Relative Abundance
Shorthead redhorse	0.349	6.1%
White sucker	0.150	2.6%
White perch	1.296	22.8%
Yellow perch	2.596	45.6%
Walleye	0.350	6.1%
Smallmouth bass	0.349	6.1%
Other	0.598	10.5%
