Percent of adult fish captured during AMP sampling with DELTFM abnormalities.

Note: DELTFM are defined as Deformities, Erosions, Lesions, Tumors, Fungus, and/or Malignancies. The increase in recent years is mostly due to an increase in the brown bullhead catch and a higher proportion of those brown bullhead having skin lesions. Analysis by Cornell University of Onondaga Lake bullhead in 2008 found a variety of pathogens including: *Trichodina*, *Saprolegnia*, *Digenean* infestations, *Micrococcus luteus*, and *Aeromonas sobria*.
